

out-of-pocket repair  
costs for your HVAC?

we have you covered.

**coolCARE**  
PROTECTION PLANS

## what is covered?

▶ Your coolCARE coverage gives you additional labor coverage to your 10-year *limited* parts warranty. Most manufacturer warranties do not cover labor charges for repairs. Our plan enables you to know that for the duration of your manufacturer parts warranty, any labor costs associated with repairs are also covered.\*

**If your unit is less than two years old we can add extended labor coverage today.**

## sounds great but how much is extra labor coverage really worth?

One service call with a warranty part repair can still have hundreds of dollars worth of labor charges. Our program gives you added protection at no additional cost so you know as long as your system is covered so is your wallet from unexpected repair costs.

### what is the cost for coverage?

Ten years of complete parts with added labor coverage for \$1000 per system or less. Additional fees are available for accessory items.
